

URBAN WASTE MANAGEMENT INSTRUCTIONS

FAMILY MEMBERS

NOT INFECTED AND NOT SUBJECT TO COMPULSORY QUARANTINE

Has been required to perform the waste separation collection **with the usual waste collection methods**, but with the effort to separate carefully the different recyclable waste (by waste fractions), **in order to reduce** as much as possible **the non-recyclable dry waste**

GOOD PRACTICES

in case of cold, use disposable tissues and dispose of them inside the personal dry waste container

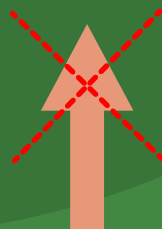

any gloves and masks used also outside the home, must be disposed of inside the personal dry waste container

use two or more trash bags, one inside the other and then place them inside the personal dry waste container

place out the residence the personal dry waste container in accordance with the scheduled day of collection and in accordance with your municipality's dispositions.

Please make sure that pets do not go near your trash bags
