

Welcome to the Community of Roveredo (this community includes Borgonuova, Cevolini I, and Cevolini II)

This content is specific to your community. As you meet and talk with other Airmen at work you might discover subtle differences in waste collection that may not be how disposal is done in your community. This is the information that you should follow...contact our Community Recycling Liaison (DSN 632-2511 or commercial 0434-30-2511) when you encounter issues or problems. If a certain type of waste is not found in your community's pamphlet, refer to the [Waste Segregation](#) link for more detailed information.

NOTE: Many families' use or purchase containers to be used at their residence for "pre-separation" of waste collected throughout a week or two week period. These are placed in a closet, in the garage, or outside in a location not visible from the street. These "personal" containers help in keeping your waste separated so that when it's time to dispose of your waste it's ready to be placed in the appropriate collection container. The collection location could be at the residence curbside, a public street container, or the Ecological Platform (EP) also referred to as Waste Collection Center.

The pamphlet contains a wide variety of information and if you want to learn more, but don't read Italian, simply cut and paste what you want to learn into Google Translate. However, it's been found there are 2 main items of interest...how and when is waste collected in my community? From year to year the format of your calendar could or will change, but the content below will apply to your community regardless of the format.

The table below provides a quick reference to the first main item of interest...how is my waste collected? There is more detailed information about these waste types further into this document (waste not listed below must be taken to the EP)

WASTE TYPE	METHOD OF COLLECTION
Non-recyclable dry waste (Secco residuo indifferenziato)	Door to door pickup in yellow container
Plastic packaging and cans (Imballaggi in plastica e lattine)	Must be taken to the light blue public street container or EP
Paper and cardboard (Carta e Cartone)	Must be taken to the yellow public street container or EP
Glass (Vetro)	Must be taken to the blue public street container or EP
Organic waste/wet waste (Umido organico)	Must be taken to the brown public street container
Garden waste (Verde e Ramaglie)	Door to door pickup (however amount is limited)
Hazardous waste (Rifiuti Pericolosi)	Must be taken to the EP
Batteries and Medicines (Pile e Farmaci)	Must be taken to the appropriate street containers
Used clothes (Vestiti Usati)	Must be taken to the appropriate street containers or EP
Used Cooking Oil (Olio da Cucina Usato)	Must be taken to the appropriate street containers or EP

For door-to-door collection the container/bag needs to be placed in a visible location on the street in front of your residence after 2000 hours the night before the day of collection (disposal). If you live on a dead end street/road you might be required to take your container/bag to the main road.

Now let's address the second main item of interest...when is my waste collected? Before discussing the use of the calendar, here are month and day translations:

January	Gennaio	July	Luglio	Monday	Lunedì
February	Febbraio	August	Agosto	Tuesday	Martedì
March	Marzo	September	Settembre	Wednesday	Mercoledì
April	Aprile	October	Ottobre	Thursday	Giovedì
May	Maggio	November	Novembre	Friday	Venerdì
June	Giugno	December	Dicembre	Saturday	Sabato
				Sunday	Domenica

There are 2 zones for this community as depicted in the pamphlet...Zone 1 (green) and Zone 2 (yellow). The pamphlet map shows the line of delineation which essentially is divided by the streets [Via XX Settembre](#), [Via Mazzini](#) and [Via Pionieri dell'Aria](#). If you happen to live on the edge of the zones you should probably ask your landlord or neighbor which zone applies to your location. These zones are used to follow the calendar for the correct day/date for collecting wastes. As an example, if the calendar shows a **two bag** symbol and the words **RACCOLTA SECCO Zona 1** then on that day the pickup is in **Zone 1** and the waste type is **non-recyclable dry waste**. If there is a **tree branch** symbol and the words **RACCOLTA SFALCI E RAMAGLIE A DOMICILIO Zona 2** then on that day the pickup is in **Zone 2** and the waste type is **garden waste**.

For this calendar the first 3 letters are used to show the day of the week. So following the calendar is straightforward...as an example, if the calendar shows **RACCOLTA SECCO Zona 1** on a **Sab** (Sabato) then **Zone 1** places their **non-recyclable dry waste** at the curb no earlier than 2000 hours on Friday night. You continue in this manner throughout the year.

There are several pages of "[Glossary of Waste Collection](#)" in this pamphlet. Below is a sample of the various waste types and some examples, for more details refer to the [Waste Segregation](#) link in the webpage.

Secco residuo indifferenziato (non-recyclable dry waste): this container is used for anything that does not fall into any other category. Waste disposed of in this container **MUST** be inside a closed bag. Any additional waste left at the

curb outside of the container will NOT be collected. For any large amount of this type of collected waste you have to take it to the EP or use a pickup service that comes with a cost (contact our Community Liaison for assistance). Items allowed include; incandescent bulbs, absorbents, nylons, carbon paper, oily paper, audio and video cassettes, compact and floppy disks, pottery and clay shards; plastic cutlery, powders, vacuum cleaner bags, etc. Items NOT allowed include; recyclables (glass, aluminum, paper and plastic), household toxic waste, bulky items, Tetrapak containers (milk, juice, wine, cream), organic waste (Umido), etc. For a more complete listing of what can or cannot be disposed of in this container refer to the [Waste Segregation](#) link in the webpage.

Imballaggi in plastica e lattine (plastic packaging and cans): you must use the public street container. You will want to ask your landlord for the closest locations of these containers from your residence. This container is used for plastic cases, bags, bottles, disposable plates and cups as well as cans (aluminum and tin). You need to breakdown plastic packaging and cans to reduce the volume so that more can fit in the container. NOTE: while bottle caps are considered part of this waste type, there is an option that you can use that helps with cancer research and treatment. Please see the “PLASTIC BOTTLE CAP RECYCLING” section in the [Waste Segregation](#) link for more info. You may NOT dispose of any plastic refuse if it contains liquids or residues from the kitchen and other biodegradable waste. In other words, any plastics or cans disposed of must be completely empty and clean. If you have a large amount of this type of waste to get rid of it is recommended you take that to the EP.

Carta e Cartone (paper and cardboard): you must use the public street container. You will want to ask your landlord for the closest locations of these containers from your residence. This container is used for paper, cardboard, cartons, etc...for more detailed information about “etc.” go to the [Waste Segregation](#) link. You need to breakdown boxes and cartons so that they can fit in the container. You CANNOT dispose of sandpaper, plastic paper, paper joined with aluminum, very dirty or oily paper, carbon paper, or plastic bags (again, refer to the [Waste Segregation](#) link for more info about these types of waste). Cartons cannot contain liquids or residues from the kitchen and other biodegradable waste. DO NOT use a plastic bag to hold your discarded paper and cardboard and then dump that in the container. This inappropriately mixes the waste types so simply put your paper/cardboard directly into the container. If you have a large amount of cardboard to get rid of it is recommended you take that to the EP.

Vetro (glass): you must use the public street container. You will want to ask your landlord for the closest locations of these containers from your residence. Glass products that fit into the container or are broken can be placed in these containers. Items that CANNOT be disposed of in this container: bottles or/and jars with food or liquid residue, mirrors, crystal or pottery, plastic bags, light bulbs, and lamps (again, refer to the [Waste Segregation](#) link for more info about these types of waste). Waste disposed of in this container MUST be loose in the container DO NOT put this waste in a plastic

bag in the container to hold your glass. This inappropriately mixes the waste types so simply put your glass directly into the container. You may NOT dispose of any glass refuse if it contains liquids or residues from the kitchen and other biodegradable waste. In other words, any bottle or jar disposed of must be completely empty and clean.

Umido organico (organic waste/wet waste): you must use the public street container. You will want to ask your landlord for the closest locations of these containers from your residence. This type of waste includes leftover or spoiled food and food waste as well as any biodegradable waste such as small quantities of flowers and leaves (again, refer to the [Waste Segregation](#) link for more info about these types of waste). This type of waste MUST be put inside a biodegradable bag (you cannot use a regular plastic bag) before placing in the container...bags can be purchased at almost any grocery store. Before disposing this type of waste into the biodegradable bag you need to remove all packaging holding the organic/wet waste and properly dispose of the packaging in the appropriate container.

Verde e Ramaglie (garden waste): grass, cut flowers, leaves, twigs, etc. is collected at your residence in accordance with the calendar or disposed of at the EP. You can dispose of grass, cut flowers, leaves, twigs, etc. (for more detailed information about "etc." go to the [Waste Segregation](#) link) in a yard bag and you can tightly bind up branches/twigs into small bundles. You are limited to 8 bags total for any single collection. You cannot dispose of stones and/or soil at the EP. When you take bags/boxes of this type to the EP you will have to dump out the garden waste where directed and then you can put the boxes or bags in their proper location (disposed separately).

Hazardous waste (Rifiuti Pericolosi): toxic/corrosive/flammable/hazardous/harmful products and/or containers labeled T (skull) and/or F (flame). All of this waste type (refer to the [Waste Segregation](#) link for more info) MUST be taken to the EP. Common sense should prevail with this waste; as an example, a bottle of bleach (XI symbol) can be thoroughly cleaned and then disposed of with plastic. However, a can of paint thinner or spray paint (might have a flame or skull symbol), either full or empty, should be taken to the EP...when in doubt take it to the EP.

Batteries and Medicines (Pile e Farmaci): this waste is disposed of in appropriate street containers placed inside or outside electrical/electronic shops and pharmacies. You will want to ask your landlord for the closest locations of these containers from your residence. This container is used for exactly what it states, however, before discarding of any battery or medicine you need to remove the packaging and discard that in the appropriate, separate container (e.g. plastic medicine bottles are discarded as plastic; refer to the [Waste Segregation](#) link for more info). Do not dispose of syringes in the medicine container or any medical spray cans labeled T and/or F.

Olio da Cucina Usato (used cooking oil): you must use the public street container or take it to the EP. You will want to ask your landlord for the closest locations of these containers from your residence. This container is used for exactly what it states, you will pour the oil into the street container and then discard the cleaned out jug/bottle in the appropriate, separate container (refer to the [Waste Segregation](#) link for more info).

Indumenti Usati (used clothing): you must use the public street container, take it to the EP or you can take it to the [Parish Vicarage--CARITAS](#). You will want to ask your landlord for the closest location from your residence. The street container is used for exactly what it states, however, before discarding of any clothes you need to remove anything that is not clothing (hangars, packaging, etc.) and discard that in the appropriate, separate container (refer to the [Waste Segregation](#) link for more info). [If you drop clothing off at the Parish it's recommended to do so in the morning and they ask that all clothes are clean and ready for use.](#)

NOTE: [leaving waste outside of a street container is a violation of the rules and laws governing the recycling program.](#) This is where personnel have been caught...go back to the recycling webpage and click on the [Violating the Law](#) link for more information about what happens when you are caught improperly disposing your waste. Also, burning your waste is a violation of the law.

RAEE: this waste type includes household appliances (electric and electronic) that must be taken to the EP. Refer to the [Waste Segregation](#) link for more info.

The pamphlet contains information about the Ecological Platform (EP) also referred to as Waste Collection Center (Centri di Raccolta). The waste collection center is a place dedicated to dispose of waste that cannot be picked up by the "door-to-door" service or waste that cannot be disposed of in the public street containers. [Essentially you need a magnetic card, provided by your landlord, to access the EP. If you lose the card you will be required to pay €5 for a replacement and you must also return the card to the landlord when you vacate the residence.](#) You also need to make sure all the waste is sorted before bringing it to this center. There is a listing of the types of things you can bring to the EP, but a more extensive list can be found at the [Waste Segregation](#) link. However, be advised that the types of wastes allowed can change without notice based on changes to the law. It also provides the location, days and times of operation for the EP on [page 3](#). This excludes any Italian holiday.

If you reside in an apartment/condo type complex these same rules apply and most likely there will be a centrally located waste area with public type containers. You need to comply with the rules of this calendar and any rules that might be imposed by the landlord of the complex.

For bulk waste (Ingombranti) pickup service the cost can range from €80,00 to € 180,00 with a cash payment required to be paid on the pickup day. Generally you need to provide notice 3 weeks in advance of your requested pick up date. You can avoid the cost by delivering directly to the Ecological Platform, but if that is not practical contact our Community Recycling Liaison to work out the details through email.
