

Welcome to the Community of San Quirino (this community includes San Foca, Sedrano, and Villotte)

This content is specific to your community. As you meet and talk with other Airmen at work you might discover subtle differences in waste collection that may not be how disposal is done in your community. This is the information that you should follow...contact our Community Recycling Liaison (DSN 632-2511 or commercial 0434-30-2511) when you encounter issues or problems. If a certain type of waste is not found in your community's pamphlet, refer to the [Waste Segregation](#) link for more detailed information.

NOTE: Many families' use or purchase containers to be used at their residence for "pre-separation" of waste collected throughout a week or two week period. These are placed in a closet, in the garage, or outside in a location not visible from the street. These "personal" containers help in keeping your waste separated so that when it's time to dispose of your waste it's ready to be placed in the appropriate collection container. The collection location could be at the residence curbside, a public street container, or the Ecological Platform (EP) also referred to as Waste Collection Center.

The calendar contains a wide variety of information and if you want to learn more, but don't read Italian, simply cut and paste what you want to learn into Google Translate. [For this community the pamphlet has been translated.](#) However, it's been found there are 2 main items of interest...how and when is waste collected in my community? From year to year the format of your calendar could or will change, but the content below will apply to your community regardless of the format.

The table below provides a quick reference to the first main item of interest...how is my waste collected? There is more detailed information about these waste types further into this document (waste not listed below must be taken to the EP)

WASTE TYPE	METHOD OF COLLECTION
Non-recyclable dry waste (Secco residuo indifferenziato)	Door to door pickup in yellow bags
Plastic packaging and cans (Imballaggi in plastica e lattine)	Must be taken to the multi-material public street container
Paper and cardboard (Carta e Cartone)	Must be taken to the multi-material public street container
Glass (Vetro)	Must be taken to the brown public street containers
Organic waste/wet waste (Umido organico)	Must be taken to the green/red public street containers
Garden waste (Verde e Ramaglie)	Must be taken to the EP
Hazardous waste (Rifiuti Pericolosi)	Must be taken to the EP
Batteries and Medicines (Pile e Farmaci)	Must be taken to the EP
Used Cooking Oil (Olio da Cucina Usato)	Must be taken to the EP
Used clothes (Vestiti Usati)	Must be taken to the appropriate street containers or EP

For door-to-door collection the container/bag needs to be placed in a visible location on the street in front of your residence after 2000 hours the night before the day of collection (disposal). If you live on a dead end street/road you might be required to take your container/bag to the main road.

There are 2 areas for this community that split the collection for non-recyclable dry waste...Area 1 is San Quirino and Area 2 is San Foca, Sedrano, and Villotte. Unlike many other communities, this one does not provide a yearly calendar that depicts collection days for door-to-door service since there is only one door-to-door service.

WASTE TYPE	AREA 1 COLLECTION	AREA 2 COLLECTION
Non-recyclable dry waste (Secco residuo indifferenziato)	Wednesday (Mercoledì)	Saturday (Sabato)

So the process is straightforward...you follow the day and the corresponding area. If you live in Area 1 then you place non-recyclable dry waste container at the curb no earlier than 2000 hours on Tuesday night. If you live in Area 2 then you place non-recyclable dry waste container at the curb no earlier than 2000 hours on Friday night. You continue in this manner throughout the year.

Secco residuo indifferenziato (non-recyclable dry waste): yellow bags are provided by the community (Town Hall-Ufficio Ambiente, located at Via Molino di Sotto, 41; office is open Monday-Friday from 1000-1230 hours as well as Monday and Wednesday from 1600-1730 hours or contact the Community Liaison for assistance). These bags are used for anything that does not fall into any other category. Items allowed include; incandescent bulbs, absorbents, nylons, carbon paper, oily paper, audio and video cassettes, compact and floppy disks, pottery and clay shards; plastic cutlery, powders, vacuum cleaner bags, etc. Items NOT allowed include; recyclables (glass, aluminum, paper and plastic), household toxic waste, bulky items, Tetrapak containers (milk, juice, wine, cream), organic waste (Umido), etc. For a more complete listing of what can or cannot be disposed of in this container refer to the [Waste Segregation](#) link in the webpage.

Imballaggi in plastica e lattine (plastic packaging and cans): you must use the public street container or take it to the EP. This container is used for plastic cases, bags, bottles, disposable plates and cups as well as cans (aluminum and tin). You need to breakdown plastic packaging and cans to reduce the volume so that more can fit in the container. NOTE: while bottle caps are considered part of this waste type, there is an option that you can use that helps with cancer research and treatment. Please see the "PLASTIC BOTTLE CAP RECYCLING" section in the [Waste Segregation](#) link for more info. You may NOT dispose of any plastic refuse if it contains liquids or residues from the kitchen and other biodegradable waste. In other words, any plastics or cans disposed of must be completely empty and clean.

Carta e Cartone (paper and cardboard): you must use the public street container or take it to the EP. This container is used for paper, cartons, etc. (for more detailed information about “etc.” go to the [Waste Segregation](#) link) with cardboard placed next to the bag for collection. You need to breakdown boxes and cartons to reduce the volume. Cartons cannot contain liquids or residues from the kitchen and other biodegradable waste. You may NOT dispose of any laminated paper, wallpaper, dirty paper, sandpaper, decoration paper, cellophane, baking paper, carbon paper, etc. (again, refer to the [Waste Segregation](#) link for more info about these types of waste). Cartons cannot contain liquids or residues from the kitchen and other biodegradable waste. DO NOT put a plastic bag as this inappropriately mixes the waste types. If you have a large amount of cardboard to get rid of it is recommended you take that to the EP.

Vetro (glass): you must use the public street container or take it to the EP. This container is used for glass products that fit into the container as well as broken glass. Items that CANNOT be disposed of in this container: bottles or/and jars with food or liquid residue, mirrors, crystal or pottery, plastic bags, light bulbs, and lamps (again, refer to the [Waste Segregation](#) link for more info about these types of waste). Waste disposed of in this container MUST be loose in the container DO NOT put this waste in a plastic bag in the container to hold your glass. This inappropriately mixes the waste types so simply put your glass directly into the container. You may NOT dispose of any glass refuse if it contains liquids or residues from the kitchen and other biodegradable waste. In other words, any bottle or jar disposed of must be completely empty and clean.

Umido organico (organic waste/wet waste): you must use the public street container. This container is used for leftover or spoiled food and food waste as well as any biodegradable waste such as small quantities of flowers and leaves (again, refer to the [Waste Segregation](#) link for more info about these types of waste). This type of waste MUST be put inside a biodegradable bag (you cannot use a regular plastic bag) before placing in the container...these bags can be purchased at a supermarket. Before disposing this type of waste into the biodegradable bag you need to remove all packaging holding the organic/wet waste and properly dispose of the packaging in the appropriate container.

Verde e Ramaglie (garden waste): grass, cut flowers, leaves, twigs, etc. must be taken to the EP. For any large amount of this type of collected waste you can use a pickup service that comes with a cost (contact our Community Liaison for assistance). When you take bags of this type to the EP you will have to dump out the garden waste where directed and then you can put the bags in their proper location (disposed separately). Branches and twigs are taken as tied up bundles. You cannot dispose of stones and/or soil at the EP.

Hazardous waste (Rifiuti Pericolosi): toxic/corrosive/flammable/hazardous/harmful products and/or containers labeled T (skull) and/or F (flame). All of this waste type (refer to the [Waste Segregation](#) link for more info) must be taken to the

EP. Common sense should prevail with this waste; as an example, a bottle of bleach (XI symbol) can be thoroughly cleaned and then disposed of with plastic. However, a can of paint thinner or spray paint (might have a flame or skull symbol), either full or empty, should be taken to the EP...when in doubt take it to the EP.

Batteries and Medicines (Pile e Farmaci): this waste must be taken to the EP. This container is used for exactly what it states, however, before discarding of any battery or medicine you need to remove the packaging and discard that in the appropriate, separate container (e.g. plastic medicine bottles are discarded as plastic; refer to the [Waste Segregation](#) link for more info). Do not dispose of syringes in the medicine container or any medical spray cans labeled T and/or F.

Olio da Cucina Usato (used cooking oil): you must take it to the EP. This container is used for exactly what it states, you will pour the oil into the container and then discard the cleaned out jug/bottle in the appropriate, separate container (refer to the [Waste Segregation](#) link for more info).

Indumenti Usati (used clothing): you must use the public street container, you will want to ask your landlord for the closest location from your residence. This container is used for exactly what it states, however, before discarding of any clothes you need to remove anything that is not clothing (hangars, packaging, etc.) and discard that in the appropriate, separate container (refer to the [Waste Segregation](#) link for more info).

NOTE: leaving waste outside of a street container is a violation of the rules and laws governing the recycling program. This is where personnel have been caught...go back and click on the [Violating the Law](#) button for more information about what happens when you are caught improperly disposing your waste. Also, burning your waste is a violation of the law.

RAEE: this waste type includes household appliances (electric and electronic) that must be taken to the EP. Refer to the [Waste Segregation](#) link for more info.

The pamphlet contains information about the Ecological Platform (EP) also referred to as Waste Collection Center. The waste collection center is a place dedicated to dispose of waste that cannot be picked up by the "door-to-door" service or waste that cannot be disposed of in the public street containers. It informs you that personnel that work at the EP can check your ID before granting access to the area. The ID might be the first page of your lease to show residency or a magnetic card provided by your LL for access. You also need to make sure all the waste is sorted before bringing it to this center. There is a listing of the types of things you can bring to the EP, but a more extensive list can be found at the [Waste Segregation](#) link. However, be advised that the types of wastes allowed can change without notice based on changes to the law. It also provides the days and times of operation for the EP. This excludes any Italian holiday.

If you reside in an apartment/condo type complex these same rules apply and most likely there will be a centrally located waste area with public type containers. You need to comply with the rules of this calendar and any rules that might be imposed by the landlord of the complex.

For bulk waste (Ingombranti) pickup service the cost can range from €80,00 to € 180,00 with a cash payment required to be paid on the pickup day. Generally you need to provide notice 3 weeks in advance of your requested pick up date. You can avoid the cost by delivering directly to the Ecological Platform, but if that is not practical contact our Community Recycling Liaison to work out the details through email.
