

Welcome to the Community of San Vito al Tagliamento (this community includes Carbona, Gleris, Ligugnana, Rosa, San Vito e Prodolone, and Savorgnano)

This content is specific to your community. As you meet and talk with other Airmen at work you might discover subtle differences in waste collection that may not be how disposal is done in your community. This is the information that you should follow...contact our Community Recycling Liaison (DSN 632-2511 or commercial 0434-30-2511) when you encounter issues or problems. If a certain type of waste is not found in your community's pamphlet, refer to the [Waste Segregation](#) link for more detailed information.

NOTE: Many families' use or purchase containers to be used at their residence for "pre-separation" of waste collected throughout a week or two week period. These are placed in a closet, in the garage, or outside in a location not visible from the street. These "personal" containers help in keeping your waste separated so that when it's time to dispose of your waste it's ready to be placed in the appropriate collection container. The collection location could be at the residence curbside, a public street container, or the Ecological Platform (EP) also referred to as Waste Collection Center.

The calendar contains a wide variety of information and if you want to learn more, but don't read Italian, simply cut and paste what you want to learn into Google Translate. However, it's been found there are 2 main items of interest...how and when is waste collected in my community? From year to year the format of your calendar could or will change, but the content below will apply to your community regardless of the calendar format.

The table below provides a quick reference to the first main item of interest...how is my waste collected? There is more detailed information about these waste types further into this document:

WASTE TYPE	METHOD OF COLLECTION
Non-recyclable dry waste (Secco residuo indifferenziato)	Door to door pickup in yellow container
Plastic packaging and cans (Imballaggi in plastica e lattine)	Door to door pickup in blue bags
Paper and cardboard (Carta e Cartone)	Door to door pickup in grey container
Garden waste (Verde e Ramaglie)	Door to door pickup in green container
Glass (Vetro)	Must be taken to the blue public street container
Hazardous waste (Rifiuti Pericolosi)	Must be taken to the EP
Batteries and Medicines (Pile e Farmaci)	Must be taken to the appropriate street containers
Organic waste/wet waste (Umido organico)	Must be taken to the brown locked public street container
Waste not listed above	Must be taken to the EP

For door-to-door collection the container/bag needs to be placed in a visible location on the street in front of your residence after 2000 hours the night before the day of collection (disposal). If you live on a dead end street/road you might be required to take your container/bag to the main road.

There are 3 zones for this community that split the collection of non-recyclable dry waste. The yellow zone covers waste collection for San Vito e Prodolone; the green zone for the villages of Carbona, Gleris, Iguignana, Rosa, Savorgnano, and a couple streets; and the pink zone for the historical center and some other streets/piazzas. The other 3 door-to-door waste collections apply to all zones. If you happen to live on the edge of the zones you should probably ask your landlord or neighbor which zone applies to your location. These zones are used to follow the calendar for the correct day/date for collecting wastes. As an example, if the calendar shows a yellow S then on that day the pickup is in the yellow zone and the waste type is non-recyclable dry waste.

Now let's address the second main item of interest...when is my waste collected? Before discussing the use of the calendar, here are month and day translations:

January	Gennaio	July	Luglio	Monday	Lunedì
February	Febbraio	August	Agosto	Tuesday	Martedì
March	Marzo	September	Settembre	Wednesday	Mercoledì
April	Aprile	October	Ottobre	Thursday	Giovedì
May	Maggio	November	Novembre	Friday	Venerdì
June	Giugno	December	Dicembre	Saturday	Sabato
				Sunday	Domenica

So following the calendar is straightforward...you follow the day or the date of the month and the corresponding color for your zone (non-recyclable dry waste only). If the red S symbol is shown on a Sabato then those in the red zone place their non-recyclable dry waste container at the curb no earlier than 2000 hours on Friday night. If the orange C symbol is shown on Martedì then all zones place their paper and cardboard at the curb no earlier than 2000 hours on Monday night. The same applies for the green V and the blue P...it's for all zones. You continue in this manner throughout the year. At the end you will also find that your calendar includes January (Gennaio) and February (Febbraio) for the next calendar year...so if the next year calendars are not immediately available you still have 60 days of use with this calendar.

Secco residuo indifferenziato (non-recyclable dry waste): this container is used for anything that does not fall into any other category (again, refer to the [Waste Segregation](#) link for more info about these types of waste). Waste disposed of in this container MUST be inside a closed bag. Any additional waste left at the curb outside of the container will NOT

be collected. For any large amount of this type of collected waste you have to take it to the EP or use a pickup service that comes with a cost (contact our Community Liaison for assistance). You CANNOT dispose of organic waste, dangerous waste, recyclable waste or liquids.

Imballaggi in plastica e lattine (plastic packaging and cans): blue bags are provided by Ambiente Servizi. These bags are provided annually at no cost. If you use all your bags before the end of the year you can purchase them at a grocery store (e.g. COOP, Eurospin, etc.). If you cannot find the blue bags, Ambiente Servizi allows the use of clear bags as a replacement (no other color is allowed). This bag is used for plastic cases, bags, bottles, disposable plates and cups as well as cans (aluminum and tin). You can dispose of more than one bag during any single collection. You need to breakdown plastic packaging and cans to reduce the volume so that more can fit in the bag. NOTE: while bottle caps are considered part of this waste type, there is an option that you can use that helps with cancer research and treatment. Please see the "PLASTIC BOTTLE CAP RECYCLING" section in the [Waste Segregation](#) link for more info. You may NOT dispose of any plastic refuse if it contains liquids or residues from the kitchen and other biodegradable waste. In other words, any plastics or cans disposed of must be completely empty and clean.

Carta e Cartone (paper and cardboard): this container is used for paper, cardboard, cartons, etc...for more detailed information about "etc." go to the [Waste Segregation](#) link. You are allowed to dispose of additional waste next to the container... this means that if you have more than the container can hold you can place the excess next to the container. However, this does not mean you have an unlimited amount that you can place here. You need to breakdown boxes and cartons so that they can fit in the container, in paper bags next to the container or bundled in a pile (If you have a large amount of cardboard to get rid of it is recommended you take that to the EP). You CANNOT dispose of sandpaper, plastic paper, paper joined with aluminum, very dirty or oily paper, carbon paper, or plastic bags (again, refer to the [Waste Segregation](#) link for more info about these types of waste). DO NOT put this waste in a plastic bag in the container to hold your discarded paper and cardboard. This inappropriately mixes the waste types so simply put your paper/cardboard directly into the container.

Verde e Ramaglie (garden waste): this container is used for grass, cut flowers, leaves, twigs, etc...for more detailed information about "etc." go to the [Waste Segregation](#) link. You are allowed to dispose of additional waste next to the container...this means that if you have more than the container can hold you can place the excess next to the container. However, this does not mean you have an unlimited amount that you can place here. You can bundle up branches into small bundles of no more than 33 pounds (or 15kg). You CANNOT dispose of stones and/or soil in this container. If you have a large amount of this waste you can take that to the EP free of charge or schedule a home pick up at a cost (contact our Community Liaison for assistance). When you take bags/boxes of this type to the EP you will have to dump

out the garden waste where directed and then you can put the boxes or bags in their proper location (disposed separately).

Vetro (glass): you must use the public street container. You will want to ask your landlord for the closest locations of these containers from your residence. Glass products that fit into the container or are broken can be placed in these containers. Items that CANNOT be disposed of in this container: bottles or/and jars with food or liquid residue, mirrors, crystal or pottery, plastic bags, light bulbs, and lamps (again, refer to the [Waste Segregation](#) link for more info about these types of waste).

Hazardous waste (Rifiuti Pericolosi): toxic/corrosive/flammable/hazardous/harmful products and/or containers labeled T (skull) and/or F (flame). All of this waste type (refer to the [Waste Segregation](#) link for more info) MUST be taken to the EP. Common sense should prevail with this waste; as an example, a bottle of bleach (XI symbol) can be thoroughly cleaned and then disposed of with plastic. However, a can of paint thinner or spray paint (might have a flame or skull symbol), either full or empty, should be taken to the EP...when in doubt take it to the EP.

Batteries and Medicines (Pile e Farmaci): this waste is disposed of in appropriate street containers placed inside or outside electrical/electronic shops and pharmacies. You will want to ask your landlord for the closest locations of these containers from your residence. This container is used for exactly what it states, however, before discarding of any battery or medicine you need to remove the packaging and discard that in the appropriate, separate container (e.g. plastic medicine bottles are discarded as plastic; refer to the [Waste Segregation](#) link for more info). Do not dispose of syringes in the medicine container or any medical spray cans labeled T and/or F.

Umido organico (organic waste/wet waste): you must use the locked public street container. The key to these containers should be provided by your landlord. This type of waste includes leftover or spoiled food and food waste as well as any biodegradable waste such as small quantities of flowers and leaves (again, refer to the [Waste Segregation](#) link for more info about these types of waste). This type of waste MUST be put inside a biodegradable bag (you cannot use a regular plastic bag) before placing in the container...bags can be purchased at almost any grocery store. Before disposing this type of waste into the biodegradable bag you need to remove all packaging holding the organic/wet waste and properly dispose of the packaging in the appropriate container.

NOTE: leaving waste outside of a street container is a violation of the rules and laws governing the recycling program. This is where personnel have been caught...go back to the recycling webpage and click on the Violating the Law link for

more information about what happens when you are caught improperly disposing your waste. Also, burning your waste is a violation of the law.

The last page of this pamphlet contains information about the Ecological Platform (EP) also referred to as Waste Collection Center. It informs you that personnel that work at the EP can check your ID before granting access to the area. You also need to make sure all the waste is sorted before bringing it to this center. There is a listing of the types of things you can bring to the EP, but a more extensive list can be found at the [Waste Segregation](#) link. However, be advised that the types of wastes allowed can change without notice based on changes to the law. It also provides the days and times of operation for the EP. This excludes any Italian holiday. **For this community you can get free (while stocks last) compost material at the EP starting 15 April.**

If you reside in an apartment/condo type complex these same rules apply and most likely there will be a centrally located waste area with public type containers. You need to comply with the rules of this calendar and any rules that might be imposed by the landlord of the complex.

For bulk waste pickup service the cost can range from €80,00 to € 180,00 with a cash payment required to be paid on the pickup day. Generally you need to provide notice 3 weeks in advance of your requested pick up date. You can avoid the cost by delivering directly to the Ecological Platform, but if that is not practical contact our Community Recycling Liaison to work out the details through email.
